

Stackup

Reference	Layer Description	Thickness [μm]	ε _r
TOP	Solder mask		
	Copper	35	
	Prepreg 1080	70	4.0 - 4.3
	Prepreg 1080	70	4.0 - 4.3
IN1	Copper	35	
IN2	Core FR4	1200	4.5 - 4.6
	Copper	35	
	Prepreg 1080	70	4.0 - 4.3
	Prepreg 1080	70	4.0 - 4.3
BOT	Copper	35	
	Solder mask		

Final Thickness: 1.6 mm +/- 10%

Impedances

The following track layouts can be used to realize defined impedance. Please note that these values only provide a basic orientation. Interference factors such as angles, meanders or vias in the routing of the tracks may negatively affect the intended impedance.

Type	Resistance [Ω]	Signal	Reference	Width [μm]	Space [μm]	Width [μm]
SE	50	TOP	IN1	295	-	-
DP	90	TOP	IN1	260	135	260
DP	100	TOP	IN1	220	150	220
SE	50	BOT	IN2	295	-	-
DP	90	BOT	IN2	260	135	260
DP	100	BOT	IN2	220	150	220

SE = Single Ended, DP = Differential Pairs
